About our COMPANY

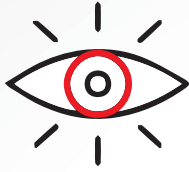

SLD Control Systems is a well-established company specializing in the manufacturing and supply of a wide range of electrical products. These include power electrical panels, power distribution panels, process control equipment, MCC (Motor Control Center) panels, PCC (Power Control Center) panels, PLC (Programmable Logic Controller) panels, test benches, and other related electronic products.

With over 10 years of industry experience, we offer products that are known for their consistent performance, even during high voltage fluctuations, and for their overall efficiency. We are proud to be an ISO 9001:2008 certified company, ensuring that we meet high standards in quality and service.

Our facility is strategically located in South Bangalore, a well-connected area that allows us to efficiently deliver orders within the agreed time frame.

Our Mission

To provide the most reliable service with the best affordable products to customers while building of basic infrastructure of electrical requirement SLD will never fail customers' expectation and we will vow to exceed it.

Our Vision

To become a Top leading Electrical Engineering Company in industry delivering best service and best products with most competitive price.

Our Values

Integrity

We will always safeguard the Integrity of our employees, customers or Company.

Excellence

We vow to do our best to exceed our customers' expectations. Innovation we are passionate about creating new solutions for crafting a better tomorrow for our Country.

Diversity

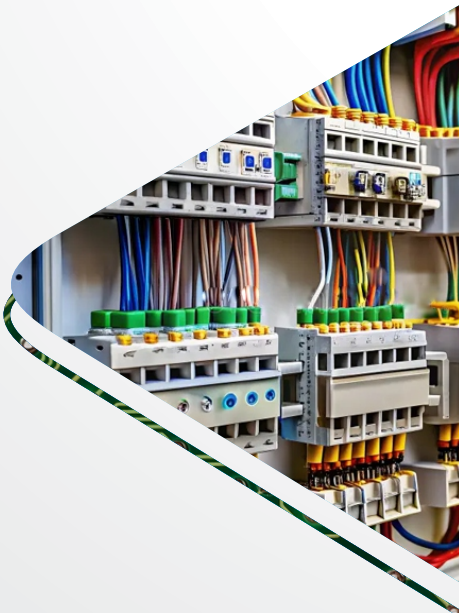

We value and respect diversity as a source of inspiration and creativity with our clients, our employees and suppliers.

Sustainability

We prioritize sustainability by optimizing resource utilization and implementing efficient production practices. Additionally, we are committed to achieving a net-zero carbon footprint.

Our Quality

The word "Quality" means "SLD". Our Quality of Products and Services both are International Standards. We comply to the latest IEC 61439 Part I and Part II standards. All the materials are sourced from the OEMs with a stringent Quality Check Process followed at various stages of manufacturing. We believe in "safe by design doing right at first time" and also adopting "Continuous Improvement" with Customer Feedback.

Our Business

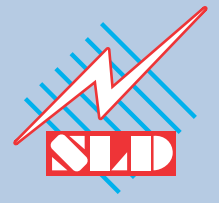

- Electrical, Automation Control Panels & Control Desks/Kiosk.
- Generator Control, Relay & Protection Panels.
- Sub-Station Automation Panels.
- Motor Control Center (MCC) Panels.
- AUTO/MANUAL load Sharing & Synchronizing Panels.
- Real Time Thyristor switching Automatic P.F. Correction Panels.
- AVR Panels.
- Rectifier Panels.
- Power Distribution Board (PDB) Panels.
- MIMIC Panels.
- Stainless Steel Control Panels for ONSHORE/OFFSHORE Applications.
- PLC based Automation Panels with DCS.
- AC/DC Drive Panels.
- Instrumentation Panels.
- Cable Tray.

Operational Strength

- Technically proficient in Control Systems.
- Complete dedication towards work.
- Very flexible and professional way of working.
- Project completion in a stipulated time frame.
- Ability to take quick decisions for proper progress in work.
- Total customer satisfaction.
- Dedicated Team Effort.
- Value Addition.

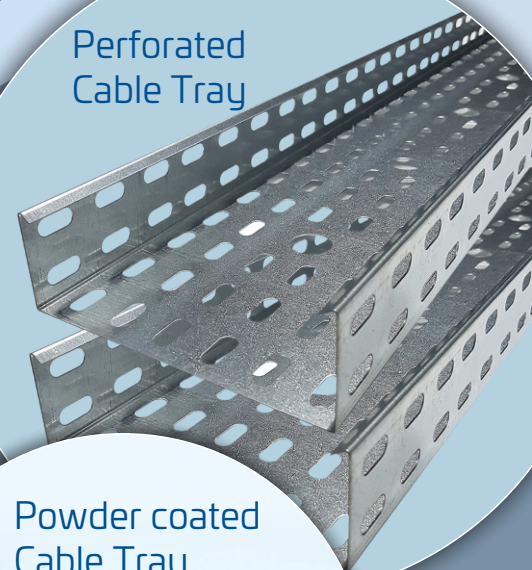

Cable Trays

- Provide an organized, accessible route for cable management, reducing clutter and simplifying maintenance.
- Help protect cables from physical damage from external forces, environmental factors, or chemical interactions.
- Improve safety by reducing the risk of electrical hazards, such as fires or shorts, that can arise from improperly managed cables.
- Offer a cost-effective solution for cable management compared to other methods, like conduits, especially in large-scale or complex installations.

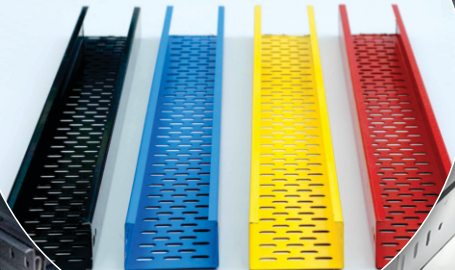

Perforated Cable Tray

Cable Ladder

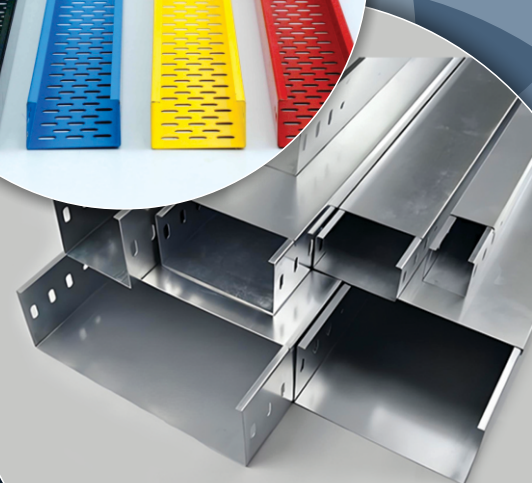

Powder coated Cable Tray

As a prominent cable tray manufacturer, we are committed to providing top-quality products within the agreed-upon timeline. By handling the manufacturing process ourselves, we remove the middleman, allowing us to offer our customers more affordable prices while maintaining superior quality.
